

The use of cell phones in flight is UNSAFE and for anybody to think otherwise has fallen asleep. The priority of all crew members is to make sure that passengers are secured in a safe environment in each and every aircraft not to mention how disturbing it would be for other passengers on board the aircraft. The communication of cell phone usage should not be permitted in flight. It would aide and help unseen terrorists on board to better communicate another hijacking. Let us not forget 9/11. Let's not get lax to think that it will not happen again. We should not allow any means of contact in the air among passengers with the use of cell phones. As a SAFETY PRECAUTION for their safety and all crew members on board as well. I pray God you people will wake up.
